

Team/Group	S2-CB-03 Group 1		
Date:	12/10/2021	Time:	13.00 – 13.45
Minutes prepared by:	Soleil	Location:	Oil 2.60 Open Space B
1. Purpose of the meeting			
Feedback. Question.			
2. Attendance			
Mohammad Nazibul Khan Esther Wolfs Lars Kluijtmans Soleil Umwiza Michiel Koehorst			
3. Agenda			
Topic	Discussion		
Feedback from last presentation	Send all deliverables this week such as process report. Project plan: is minimal, everything is in it but it's not a masterpiece. URS: is not satisfactory, should improve it, we have to write more use cases, first use case already goes wrong, extension is select wrong option, but pre-condition is already in the panel. Rotate roles between members, like in meetings so everyone speaks and is contributing to the meeting. Test plan: very minimal, needs data. Like login information so the testers know how to use the program.		
New stuff	Update project plan: add iteration, add new requirements to planning, update the URS with the new requirements. Write the requirements down so you know the client will accept it.		
Where to find barcode and tag reader	We asked where to get the tag reader and barcode scanner to use in our project and borrowed it from the issd after the meeting.
