3. Agenda

Topic	Discussion
Activity diagram	Number of employees should be more detailed. If you compare number with how many you want and how many you need. Clarify what bigger than means. How does it end? First check if it's the last one. Are we using query 2? Make it more specific.
Feedback	-All documents have been sent. Overall, everything looks good. However, some of the document such as user case still use buttons and clicks. -Presentation: the presentation was good, structured, a lot of functionalities, good to follow. The only issue, we implement a lot of extra things and forget to complete the basic functionalities such as the automatic schedule. -URS still need to update. Make sure mandatory things are in there. But mostly focus on what the client wants.
